12.x: composer not updating latest /trunk/@47/ from jcapture-applet due to missing directory 'src'

Subject

12.x: composer not updating latest /trunk/@47/ from jcapture-applet due to missing directory 'src'

- Regression

Resolution status
Works For Me

Lastmod by
Xavier de Pedro

Description	This has been recently introduced (in the last weeks, during March 2014, probably) in 12.x
	composer is not updating latest packages due to issues in /trunk/@47/ from jcapture-applet due to
	missing directory 'src'

Discard changes [y,n,y,?]7

```
Your choice [c]? You are already using composer version
70a20ebcc19f1ea8ab0954a4fbdce208b30085e7. php is a tracked alias for /usr/bin/php Loading
composer repositories with package information Installing dependencies (including require-dev)
from lock file - Updating jcapture-applet/jcapture-applet dev-trunk (/trunk/@46 => /trunk/@47)
The package has modified files: ! src Discard changes [y,n,v,?]? n
```

Easy to solve?
