Description
 after upgrade from 9.x to 12.x wiki pages with html code are reopened wrongly with wysiywg editor and no way to switch to normal through UI

 It was rather annoying, since there was no way to revert back to a the normal plain text editor unless I appended by hand in the url the "&mode_normal=y" param.

 I'll try to reproduce locally with the dump of the production site where this happened, and if I manage, I'll send a dbsump to a developer willing to bugfix it.
