Description

On this page:

`/tiki-view_forum_thread.php?comments_parentId=15&forumId=1`

The previous topic link produces this url:

`/tiki-view_forum_thread.php?comments_parentId=12&topics_offset=-1`

This page is a Error Page.

This page also gets indexed by google and is crawled by bots.

I have added a line to my robots.txt to tell google bots not to include it in there indexing

Disallow: /*topics_offset=-1

Thanks, for considering addressing this. Really appreciate tiki.
