Description

For some reason, some subscribers to a newsletter got deleted when one of them validated the link to his subscription. This happened twice to me in a production site. I'll see if I can reproduce it in a show instance. More details will come once the issue is reproduced in the show.t.o instance.

Oh well, unable to reproduce in the show.t.o instance. Maybe language-specific, maybe conflict of prefs? Who knows, looks like too-edge case, so closing.
