### Description

Records are not found when using the trackerfilter plugin where the filter field is an ItemLink field where the contents are 'created' from multiple fields in the source tracker.

A 12.x 'show' has been set up to demo this bug - but it is also a problem in 13.x as well

---

Added quote below () as extra info was provided in the devel list:

“

*(...) definitely a regression as I have a production site where it used to work. I can't be sure when it stopped working but the site was built with 10.x so it was OK then and the site is now on a 11.x daily build from 4Sep'13 and it doesn't work anymore - only realised it when I used the site data to test the latest 12.x*
