Description

No idea whether this is also happening in 12.x or earlier. I just noticed this in trunk, while reviewing the improvements to Surveys in order to update the documentation page Tiki13

I created a survey as admin, added 3 questions (one of them is a rating from 1 to 10 with radio buttons). I provided 2 answers as user admin, and I saw that no vote count nor average was shown from the rating scale 1...10

Solution

Hi Nelson,

The issue due to the value is not updated in db. Because in the table "tiki_survey_questions" the fields "votes" and "value" is having default value as "Null". That is updating using the increment method to increment the votes counting and rating. From "Null" it is not incrementing. we can put default value as "0" for the two fields.

I made the changes to tiki.sql and a patch file is created to fix the issue.

Please refer commit-id--51734

Please check and advice.

Workaround

note: mani is having a look to see if he can fix.
