u: admin

p: 12345

Interface set to Spanish, and using Chrome on GNU/Linux. You click at "Preview Info", or at "Send Info", and nothin happens, besides that you are sent to the start of the page.

I could'nt make a show.t.o instance for 12.x since there might be an error here in dev.t.o. Every time I select 12.x for the show.t.o instance, it gets created one for 13.x

Solution

The popup not appearing was due to a query error which is fixed in r51638. But the release version is from tiki_release pref. I am not sure where this is set - the default is zero.

Please retest.

I think tiki_release is not always set? Anyway, I emailed dev list about this.

Solved with current codebase in 12.x and 13.x. Nice!
