Comments

gezza 04 Jun 14 13:13 GMT-0000

if I run the related Tracker_as_Calendar_12 profile on a fresh local Tiki13 install (r51577), than the full calendar is not displayed, the other parts are ok when looking at tiki-index.php?page=Tracker_as_Calendar_12

are there any additional settings to be made to be able to reproduce locally?

Xavier de Pedro 05 Jun 14 19:00 GMT-0000

Hi gezza.

I tried today with r51584, on a clean install again, and I can confirm that the calendar widget is not displayed any more.

Things are getting worse...
