Description
I had this plugin working in Tiki9:

```
{TRACKERSTAT(trackerId="2", fields="42", show_percent="n", show_bar="y", status="op",
show_link="n")}{TRACKERSTAT}
```

Field 42 is a Category, with a few children.

It was working nicely in Tiki9.

Once upgraded to Tiki12.x svn, it stopped showing results.

If I change the field to a text field, results are shown as expected for that text field, os it seems a regression with categories.

Reproduced here:
http://xavi-9794-5261.show.tikiwiki.org/tiki-index.php?page=HomePage

u: admin
p: 12345

Tracker 1 has some items. Field 1 is title, field 3 category. No results shown for field 3.

Still buggy, as of April 18th, 2015
