Description

Bootstrap icons are not found with bootswatch themes that have the font icon path set in their less file to a different location than used in Tiki. For example for the bootswatch amelia theme, the styles/bootswatch_themes/options/amelia/less/variables.less file has the variable @icon-font-path set to "../fonts", when it should be set to "../vendor/twitter/bootstrap/fonts/".

To avoid having to alter the bootswatch themes which could complicate upgrading them, there should be a tiki specific less file that sets this variable and overrides that in any individual theme less file. This would mean this variable would not need to be set in any theme less file (currently it is set in each tiki theme file). The same should be done for the @icon-font-name and @icon-font-svg-id variable names as well.

Below is a demonstration of the problem with screenshots of tiki_list-trackers.php:

Missing icons with the Bootswatch Amelia theme:

Icons are present in the bootstrap default theme:

[+ Create](#)[⚡ Duplicate](#)[📄 Import ▾](#)

Solution

The value of the @icon-font-path was corrected in each theme's variables.less file, to point to the actual location of the fonts in the vendor/twitter/bootstrap/fonts/ directory.
