Description

I tried to edit <http://dev.tiki.org/tiki-editpage.php?page=Search%20engine%20optimization> and got "Can't duplicate alias link, SEFURL link already present in SEF page"

The page did save though:

<http://dev.tiki.org/tiki-pagehistory.php?page=Search%20engine%20optimization&oldver=88>

How can the user know what is the duplicate? Perhaps a link to that page so the user can cleanup the duplicate?

Solution

I think this is just an "English" problem.

Basically what the error message is saying is that an alias link for SEFURL is already duplicated in the page SEF.
