Description
    13.x: Profiles with "random header images" stopped working as expected compared to 12.x

    See it reproduced with profile Easy GeoBlog, which doesn't display any images in the header
    (images aren't saved in the local tiki instance).
    See it reproduced here:
    http://xavi-9794-5064.show.tikiwiki.org/tiki-list_file_gallery.php?galleryId=5

    --
    It currently works as expected (only small issues with surrounding box).

    Who knows what happened. Maybe temporary network issue to display images from tiki.org or
    similar.
    Closing the report
