Description

13.x: Can't display .webm videos uploaded to a tiki site

See it reproduced in a bug report textarea here:

<https://dev.tiki.org/item5321>

Tried with these two ways:

1. Using the html5 video tag, in a similar way as indicated here:

http://www.w3schools.com/html/html5_video.asp

□□□□□□

```
{HTML()} &lt;video width=&quot;320&quot; height=&quot;240&quot; controls&gt;
&lt;source src=&quot;http://doc.tiki.org/dl1108&quot; type=&quot;video/webm&quot;&gt;
Your browser does not support the video tag. &lt;/video&gt; {HTML}
```

- Your browser does not support the video tag.

2. Using the PlginWebDocViewer in Tiki12+, that according to its documentation, it can display webm videos.

□□□□□□

```
{WEBDOCVIEWER(url=&gt;http://doc.tiki.org/dl1108, width=&gt;425,
height=&gt;350)} {WEBDOCVIEWER}
```

None of them seem to work with Mozilla Firefox (30.0, for GNU/Linux).
Under Google Chrome (35.0), using the html5 video tag (within PluginHTML in Tiki) works fine, but using the PluginWebDocViewer nothing is shown.

See the video itself uploaded to file gallery in doc.t.o: <http://doc.tiki.org/dl1108>
