- ● 13.x next.tiki.org -> Database Version Problem

Description

This helps to check for issues & fixes.

I saw a bug on <http://next.tiki.org/user19837> (page layout is broken)

I seem to remember this bug. Was it fixed before and the site is not updated? Or is it a different bug?

Thanks!

Can PHP read .svn/entries ?

http://sourceforge.net/p/tikiwiki/code/HEAD/tree/branches/13.x/lib/setup/last_update.php#l13

Maybe it has to do with this?

<http://sourceforge.net/p/tikiwiki/code/HEAD/tree/branches/13.x/doc/devtools/svnup.sh>

Maybe the site was with svnup.sh before and no longer?

Arild Berg 18 Aug 14 08:51 GMT-0000

The SVN revision number can be read using

"select distinct revision from nodes_base"

assuming SVN 1.7 or higher is used. Then reading the wc.db database in the .svn folder
...or at least it seems so.
