Description

I've got this error while attempting to insert data in a tracker with mirror tables from a Wiki page through wikiplugin_tracker.php.

In fact, the wiki page return an error message, and it seems as if item was not inserted, then, but item is inserted. However, the field "user" (login user, 1) is not saved in the tracker (and I was logged in, and I could insert a tracer item from the same user account through the tracker directly).

Note: Tracker has less than 40 fields, and I included 40 consecutive field ids in the plugin syntax.

That's the code in the wiki page:

```
{TRACKER(trackerId=>1,fields=>1:2:3:4:5:6:7:8:9:10:11:12:13:14:15:16:17:18:19:20:21:22:23:24:25:26:27:28:29:30:31:32:33:34:35:36:37:38:39:40,action=>Name of submit button,showtitle=>y,showdesc=>y,showmandatory=>y,embedded=>y)}Ben fet!{TRACKER}
```

Thant the error message:

*Notice: Undefined index: name in
