System error.

The following error message was returned:

```
Illegal mix of collations (utf8_general_ci,IMPLICIT) and (utf8_unicode_ci,IMPLICIT) for operation '='
```

The query was:

```
SELECT DISTINCT c.`title` AS name, LEFT(c.`data`, 240) AS data, p.`hits` AS hits, c.`commentDate` AS lastModif, CONCAT(p.`pageName` ,';',c.`title`) AS pageName,outputType ,p.`pageName` AS id1,c.`threadId` AS id2, MATCH(c.`title`,c.`data`) AGAINST ('test' IN BOOLEAN MODE) AS relevance FROM `tiki_comments` c, `tiki_pages` p left join `tiki_output` on `tiki_output`.`entityId` = p.`pageName` WHERE c.`objectType` = 'wiki page' AND p.`pageName` = c.`object` AND MATCH(c.`title`,c.`data`) AGAINST ('test' IN BOOLEAN MODE) ORDER BY relevance desc, p.`hits`
```

The built query was likely:

```
SELECT DISTINCT c.`title` AS name, LEFT(c.`data`, 240) AS data, p.`hits` AS hits, c.`commentDate` AS lastModif, CONCAT(p.`pageName` ,';',c.`title`) AS pageName,outputType ,p.`pageName` AS id1,c.`threadId` AS id2, MATCH(c.`title`,c.`data`) AGAINST ('test' IN BOOLEAN MODE) AS relevance FROM `tiki_comments` c, `tiki_pages` p left join `tiki_output` on `tiki_output`.`entityId` = p.`pageName` WHERE c.`objectType` = 'wiki page' AND p.`pageName` = c.`object` AND MATCH(c.`title`,c.`data`) AGAINST ('test' IN BOOLEAN MODE) ORDER BY relevance desc, p.`hits`
```

Workaround

Seems to be caused by r51977 - can't work out how to fix it even though i do get the same problem on my local 13.x, sorry

Workaround would be to use unified search?
