## Description

Compare these 2:

<http://doc.tiki.org/LDAP+authentication>

<http://doc.tiki.org/tiki-print.php?page=LDAP+authentication>

The screenshot displays two side-by-side browser windows comparing LDAP authentication logs. The left window shows a successful login sequence with debug output. The right window shows the same sequence but with a 'debug' option set to true, resulting in a different log output.

**Left Window (Successful Login):**

```
After the login you see a screen with a successful binding to the AD/LDAP-Server
code
281: Connecting with host:port
288: Successfully connected to server
292: Switching to LDAP version 3
306: Switching LDAP referrals to true
312: Binding with credentials
325: Binding was successful
548: UTF8 encoding username for LDAPv3
574: Searching with ldap_search and filter (&(sAMAccountName=exampleuser)(objectClass=*))
in ou=europe,dc=xnet,dc=oe,dc=examplehost
581: User was found
636: Bind as CN=exampleuser,OU=users,OU=ode,OU=europe,DC=xnet,DC=oe,DC=examplehost
640: Bind successful
650: Authenticated

281: Connecting with
host:port
288: Successfully
281: Connecting with host:port
288: Successfully connected to server
292: Switching to LDAP version 3
306: Switching LDAP referrals to true
312: Binding with credentials
325: Binding was successful
548: UTF8 encoding username for LDAPv3

in ou=europe,dc=xnet,dc=oe,dc=examplehost
581: User was found
636: Bind as CN=exampleuser,OU=users,OU=ode,OU=europe,DC=xnet,DC=oe,DC=examplehost
640: Bind successful
650: Authenticated
```

**Right Window (Debug Output):**

```
Documentation
$this->options['debug'] = true;

After the login you see a screen with a successful binding to the AD/LDAP-Server
code
281: Connecting with host:port
288: Successfully connected to server
292: Switching to LDAP version 3
306: Switching LDAP referrals to true
312: Binding with credentials
325: Binding was successful
548: UTF8 encoding username for LDAPv3
574: Searching with ldap_search and filter (&(sAMAccountName=exampleuser)(objectClass=*))
in ou=europe,dc=xnet,dc=oe,dc=examplehost
581: User was found
636: Bind as CN=exampleuser,OU=users,OU=ode,OU=europe,DC=xnet,DC=oe,DC=exampleho
640: Bind successful
650: Authenticated

Be aware that after your troubleshooting you must switch off the debug option to login.
