Description

Allow to reply messages to anonymous users (which provided their email) from the contact-us tracker (created through the corresponding profile in the profiles wizard) directly through some integrated tiki feature, and not necessarily through some external software.

Maybe PluginMail if it can receive the email from the PluginTrackerList with param checkbox properly configured (failed for me with current codebase), in a similar way to receiving username in meesu-compose.php for registered users.

Solution

fixed in r52130 (13x) and r52131 (12x)
