Description

See "User contribution" tab of: <http://dev.tiki.org/user11625>

lkordix reported: <http://dev.tiki.org/item4816>

The screenshot displays two browser windows from the dev.tiki.org website. The left window shows the 'Bugs & Wish list' page for item 4816. It includes a status of 'pending', a rating of 5 stars (old), and a subject line 'Extend include_path for Net/LDAP2.php'. The right window shows the user profile page for 'User lkordix', which states 'has not contributed to any content yet'.

Workaround

One can workaround using the LIST plugin. For example, to list contributions of user foo:

No results for query.

I am experiencing the same with my own account: <https://dev.tiki.org/user232>

This only lists pages I modified in the last months. I certainly modified many more pages before 2013. I may not have contributed between 2013 and 2016, so this case cannot point to a precise cutoff point.

Strangely, user items (trackers) appear to be complete for my own account. For example, tracker item https://dev.tiki.org/tiki-view_tracker_item.php?trackerId=5&itemId=2571, which I created and last modified in 2009, still shows.

Please report if this affects other sites.

Philippe Cloutier 18 Nov 16 01:28 GMT-0000

This also affects [tiki-lastchanges.php](#).
