Description
This is perhaps by design because of the move to Bootstrap.

For new sites, the UI should prevent / warn.

For upgrades, there should be some documentation on https://doc.tiki.org/Tiki13, and ideally, this be dealt with in the upgrade script.

Similarly, there could be an issue with level 2/3/4 menus...

Hi Marc Laporte,
This is working fine now in 13 and that's the way it works in bootstrap..Gary make sure that some documentation will be added soon.

Thanks.
