

Daily Build

You can also download a pre-release tarball (ZIP file) that is continually built every six hours. See the [.timestamp](#) file to determine the time & date of the tarball.

If you can't wait for the daily build, you can [get the latest code](#) directly from SVN.

If you are looking for the last Stable / Stable LTS "official" (non-development) releases, please visit <https://info.tiki.org/download>.

To add more versions on this page, contact Oliver Hertel.

6.x LTS

- 6.x — The ../branches/6.x/.. branch from SVN

Note

This is a "Long Term Support" (LTS) version. Supported until November 2012 (when Tiki 10.1 released) extended until May 2014 (when Tiki 13.1 is released). Please see [Version lifecycle](#) for details.

9.x LTS

This can be seen on [a related issue's show instance](#).

I tried reproducing in Tiki 12. With the inline auto-toc, the problem does not happen. Without, I see no TOC at all.
