Hi Marc:

What do you mean by "missing"? You can list all available profiles which are categorized for 13.x (the ones I tested and work in 13.x, afaik).

The name still has a suffix like "\_12x", but this should be read as "working from 12x onwards".

Otherwise, there is no much sense, imho, with the given limited man power working in profiles, to clone them "as-is" just get updated names "\_13x".

My 2 cents.

I added text to the effect what Xavi is saying on the [https://profiles.tiki.org/Profiles\\_in\\_installer](https://profiles.tiki.org/Profiles_in_installer) page. Hope that suffices now.

Thanks!
