### Database Version Problem

Your database requires an update to match the the Tiki version; use [the installer](#). Using Tiki with an incorrect database version will cause errors. If you have shell (SSH) access, you can also use the following, on the command line, from the root of your Tiki installation: `php installer/shell.php`

Site now running 15.x

[nextbranding.tiki.org](http://nextbranding.tiki.org) has issues at the moment, but we are tracking this issue elsewhere since it affects another site as well.
