- 13.x-14.x: can't add new arguments to the 'wishes' plugin alias edited in dev.t.o
- 13.x-14.x: can't add new arguments to the 'wishes' plugin alias edited in dev.t.o

Description

<http://dev.tiki.org/tiki-admin.php?page=textarea> -> Simple Plugin Arguments

Argument "fields" has a value of:

26:152:54:41:101:138:43:48

Should become:

152:26:43:138:41:101:54:48

{flash type="url" movie="display863" width="585" height="476"}

Solution

The ID of the tab passed to the backend was wrong and the code that handles the alias was never executed. Also some broken frontend fixes.

rev57516, back ported to 14x and trunk (not to 13x)

Works for me. Thanks heaps rjsmelo! I leave as "pending", for Mrc to confirm that it works for him also, since he was the bug submitter
