FYI:

<http://branding.tiki.org/Favicon>

<http://branding.tiki.org/Logo>

luci is the last one who updated logos to add "Registered" (R)

If you start from SVG, it's easy to change the colors:

<http://branding.tiki.org/Tiki+Logo+in+SVG> (I think luci made this as well)

Ideally, there is a way via Tiki to upload new favicons, otherwise, you need to ask Nelson to upload them for you. Even better would be to apply color via the admin panel which overlays default favicon color, like we are discussing here for icons: <https://themes.tiki.org/Icons+SVG+or+Fonts>

I recommend

1. Grab the diamond logo at http://branding.tiki.org/Logo#Tiki_diamond_symbol (for the icon you can delete the ® symbol)
2. Change the colors to match the palette: <http://branding.tiki.org/Colors>
3. Use this: <http://realfavicongenerator.net/>

I uploaded them here: <http://branding.tiki.org/file2>

already started to apply them at dev and community sites

someone with ftp access should upload the favicon.ico files to the tiki root directories
