Chosen / improve tracker forms documentation is incomplete

When submitting this issue, I can see Chosen working. So one can get it working, but how?

I followed the steps written up in https://doc.tiki.org/Improve+Tracker+Forms

but it did not result in any improved tracker forms. I tried both the dropdown and the multiselect, though I am more interested in the latter one.

http://irc.tiki.org/irclogger_log/tikiwiki?date=2014-07-31,Thu&sel=95#l91

Xavi asked me to log this as an issue, so that someone can have a look.

Normally I submit patches myself. However, this time it should just work.

Hi Gergely, can you reproduce your issue in an associated show.t.o instance to this bug report?
So that it's easier to debug or re-test by others, let you check the fix after a svn up of the instance whenever that is needed, etc.
Thanks!
