Description

From tiki 12 on (I think)

The plugin mouseover's tip has a too big offset in both vertical and horizontal position

Example can be seen on this page:

<http://doc.tiki.org/PluginMouseover>

Workaround

A dirty workaround can be changing the following line in *lib/wiki-plugins/wikiplugin_mouseover.php*:

```
.css('left', left + $offsetx).css('top', top + $offsety)
```

to

```
.css('left', left + $offsetx - 200).css('top', top + $offsety - 130)
```
