Description
13.x: doc.t.o menu 43 (public info for anons) doesn't show 'section level 1' records, but only section level 0 and options

This means that almost all "New in version X" are not shown in the menu.

Instead of manually doing some workaround, I think this is a good dogfood case for fixing the root issue (whichever it is).

Contents of menu43 in doc.t.o as CSV file:
Workaround

Change menu levels from "section level 1" to "option".

Adn some informatin added by gezza in the doc.t.o/Tiki13#Upgrade page. (thanks for that!)
