Related-to

- ✘ [13.x-15.x dev.tiki.org can't edit values of a plugin alias](#)

Description

I don't know when this stopped working, but for sure this worked in previous versions (6.x, probably, when I last tried years ago)

I attempted to add the new argument 'shownbitem's' (set to 'y') to the plugin alias "wishes" in dev.t.o, but it doesn't get stored. When I reload the page after I hit save, the new argument is not there int the list.

To reproduce:

- Come here as admin: <http://dev.tiki.org/tiki-admin.php?page=textarea>
- Click on "wishes"
- Click on the plus green icon, next to "Simple Plugin Arguments". A new empty field will be shown at the bottom of that section.
- Add the argument pair (shownbitem y) to its corresponding fields of name and value, and hit at save at the bottom
- This new argument is not shown. And after clearing tiki caches, the wishes plugin doesn't show the number of items yet.

Solution

Fixed. See revision number and details in the other bug report that this one was a duplicate of.
