Description

13.x: when a mandatory field is not filled in a long tracker form, the user is not sent to the right section where the text is shown indicating the missing field info

Reproduced in category fields (not in text fields, which work fine) in the show.t.o instance:

<http://xavi-9794-5427.show.tikiwiki.org/tiki-register.php>

Try to register a new account, but leave the mandatory field "CountryCateg" empty.

Reproduced using Chrome.

Admin credentials:

u: admin

p: 12345

Reproduced in the registration form, and directly through the tracker1 also.

Solution

This bug doesn't show up in branch 14.x, which replaced 13.x, so this report can be closed.
