### Description

13.x: no pagination on admin groups.

Easily reproduced on t.o: <http://tiki.org/tiki-admingroups.php>

Go there and search for group TwCommunity, which is below the first 50 groups. It took a while to figure out that there was a hidden setting in that page to change the number of results shown below. And I wanted to see whether there were other groups below TwCommunity (which I didn't know their names beforehand, so using the "find box" didn't help.). And clicking at "All" didn't show more than the 50 results predefined either.
