Hi there,
I've been starting to use Search and replace tool. Great piece of tool!

I've spotted a bug there when trying to change:

- from `{IMG(src="img/flags/United_Kingdom.gif",title="en anglais")}{IMG}`
- to `{en}`

This bug makes that I end up with a *half-process done* since the replacement job is finishing with:

- `{en}"img/flags/United_Kingdom.gif",title="en anglais")}{IMG}`

It does look that the function `replace` doesn't handle having a " in the *what to replace*.

Workaround
No workaround found so far rather than making the changes one-by-one.
I've put a note on Search and replace which links to here.

As a general old grandpa advise, you should try a "mass replacement" only on one item before applying to the whole occurrence.

Note that there is a strange behavior in showing the page ("Search") if I'm searching for %~hs~%
