Description

Hi

I have upgraded TikiWiki in my application from 12.2 to 13.0 and done with most of the configuration and preferences. But unable to make ready Upload media files through Kaltura.

Actually on Upload media page, UI to upload media is not showing any controls to upload. As I have seen in 12.2 version, there is a flash build section shows there to upload media files, which is missing here in 13.0. I am sharing that Flash player is installed on my machine.

So, please help me if I am missing some settings or what?

Waiting for your reply,

Dinesh

tagged also as regression in 13.x, to match the description provided by the bug reporter

luciash d' being 23 Sep 14 13:06 GMT-0000

so we could reproduce bugs on show ?

upsafety 01 Oct 14 11:00 GMT-0000

thanks, its working now as I got the solution and according to that I need to make the chanegs in a template file named "tiki-kaltura_upload.tpl" as :

Removed this code :

```
{button class="btn btn-default" _text="{tr}Add more media{/tr}" href="tiki-kaltura_upload.php"}
```

And used this :

```
<span type="button" class="btn btn-default button">{button class="btn btn-default" _text="{tr}Add more media{/tr}" href="tiki-kaltura_upload.php"></span>
```
