Description
13.x dev.t.o bug tracker: missing category (mandatory field) at submit time didn't take the user up in the screen to where the source of the issue was and where the text message was shown ("This field is required") , and no message shown at the bottom either next to the submit button that the user has just clicked on.

Therefore, it seems as if the tracker is broken, or the tiki software doesn't work for unexpected reasons (thinking in newbie's impressions), etc..

Reproduced with Chrome 37, and FF 32.

P.S. In case it matters, feature "Chosen" is currently enabled in dev.t.o by the time of this bug report
