Description

Inter-User Messages: 'Reply to all' gets the wrong sender of the message to be replied

User1 send a message to User2.

- When User2 clicks at "Reply", everything works as expected, and User1 is transferred to the "To:" field.
- If User2 clicks at "Reply to all", value "User1" is missing from the "To:" field, and only ";User2" is placed (instead of "User1").

To reproduce, in 12.x. come here:

http://xavi-9794-5493.show.tikiwiki.org/messu-read.php?offset=0&flag=&priority=1&flagval=&sort_mode=date_desc&find=&msgId=1

as user1:

u: user1

p: user1

And click at "replyall"

You will see the the "To:" field contains: ";user1" instead of "admin"

As a reference: admin account credentials:

u: admin
p: 12345

Update

To reproduce in 14.x, you can do equivalent steps (equivalent users and passwd) here:
<http://xavi-9794-5601.show.tikiwiki.org/messu-compose.php>

Update

A fix is in the comments

Solution

A fix is in the 3rd comment.

Fixed for 12.x, 14.x and 15.x in rev r57742, r57741 and r57740 by olinuwx

Just want to confirm that we have the same issue here at linuxmao.org (Tiki 12.2).
If I could be of any help, just let me know.
Olivier

Same on Tiki 12.5

olinuxx 29 Feb 16 13:19 GMT-0000

One of the linuxmao user found a fix : please see <http://www.linuxmao.org/forumthread56526>.

tl;dr:

it happens in : templates/messu-read.tpl where the line :

```
<input type="hidden" name="to" value="{ $msg.user_reply_to|escape};{ $msg.user_to|escape}" />
```

by :

```
{if $msg.user_reply_to eq ""}
<input type="hidden" name="to" value="{ $msg.user_from|escape};{ $msg.user_to|escape}" />
{else}
<input type="hidden" name="to" value="{ $msg.user_reply_to|escape};{ $msg.user_to|escape}" />
{/if}
```

Thanks olinuxx! I couldn't easily confirm the fix (due to this other issue : item5839), but looks the right solution that one!

Thanks!

olinuxx 03 Mar 16 15:36 GMT-0000

No worries, glad it helps. To be honest, the biggest part of your thanks are going to "m31z0nyx" who is the guy who found the fix.

My part of the job was to test it on linuxmao.org (running à Tiki 12.5 version), check that it was working, report the fix here and commit to the SVN (branches 12.x, 14.x and 15.x).

This is my first commit and I hope I did everything the right way. Luckily, I had some support from "jonnyb" who pointed me on the right documentation pages helping me to understand the Tiki committing process. Thanks to him as well.

How do we do now ? Should I, or you, close this "wish" ? (which I just did)

Jonny Bradley 03 Mar 16 15:46 GMT-0000

Well done olinuwx! You did great, i was expecting more questions or some sort of general mess, so many thanks!

There aren't really hard and fast rules about this, but i usually set the status of the bug to "pending" and get the original reporter (or Xavi quite often ;) to independently test it and then close the bug themselves, but that's mainly because my code always works perfectly when i test it! 🍷
