Description

When selecting 'Quarter' in a Tiki-calendar it show the correct months (three), however when moving up or down it jumps 4 months.

Reproduction:

- <http://info.tiki.org/tiki-calendar.php?viewmode=quarter>
- It shows (at time of writing): January - March 2015
- Press the right arrow makes that: May - July 2015

Expected:

- This should be April - June 2015

Hint:

I noticed three arrays in tiki-calendar.php, where quarter is defined with 4 months in stead of 3.
