Description

Some icons are hard-coded through javascript files. One example from lib/jquery\_tiki/tiki-trackers.js line 139:

```
$row.append($('  |
```

This line hard codes a glyphicon icon regardless of the iconset set by the admin. In php files this can be fixed by loading the smarty function icon but haven't been able to fix here (tried using ajax services).

## Comments

**Jonny Bradley** 10 Mar 15 15:50 GMT-0000

But there's till time 😊

**gezza** 10 Mar 15 15:56 GMT-0000

i think the transition to icon sets should be considered as ongoing and so it will continue in Tiki15

**Jonny Bradley** 07 Apr 16 09:17 GMT-0000

I added some js functions in `lib/jquery_tiki/iconsets.js` so all we need to to is convert any existing hard-coded ones to use this.

I think i did some (e.g. `lib/jquery_tiki/tiki-jquery.js:3730`), sorry i didn't update this wish...
