Description

When I create a new tracker field and click "Add Field and Edit Advanced Option" it used to show the 2nd page where I can enter the field properties. It no longer happens and I have to click again on the fieldname to bring up that screen.

Solution

Pretty certain this got fixed, no? A combined effort by me and Anbu some time around r54234 i think...

...Sorry, but this is still a problem in my test site. — Gary

Hi Neslon/Gary,

It seems the fix by Anbu works fine, now Add Field and Edit Advanced Option works as expected in both tiki-13 and tiki-14.

Thanks.
