Description

The down arrow / right arrow to indicate dropdown/flyout child list items are missing. I don't know if this problem began in Tiki 13 or branch 14. These arrows aren't images but are made with JavaScript and CSS. Page of author, for examples and docs: <https://github.com/joeldbirch/superfish>

Solution

I was using an older browser version when I reported this (Opera 12). In newer browsers, the arrows show as expected.
