Description

Hold on, trying to reproduce on show...

Update: OK, it worked Please ignore. Closing and deleting.

Update 2: Well, actually it turned out that the "culprit" was adding the IP address to whitelist of the server requesting the FB login to Facebook App Advanced tab. Re-opening the item and re-categorizing, because I feel, Tiki should support that and not fail with the login attempt when someone sets that up on the FB App side.

luci,

Do you still have this issue in Tiki19x? I am not able to recreate after adding the server address to the Facebook whitelist.

luciash d' being 04 Feb 19 17:35 GMT-0000

Sorry Lindon, I cannot reproduce now as I have no site on 19.x using the FB login currently.
