Description

When a page contains a comma, like *comatose*, *is not the correct word* the whole comments below page section is invisible in tiki14x. So there is no way of creating a page comment.

This worked fine in Tiki9

This was buggy in a different way in Tiki12: the comment section shows up, so commenting is possible and the comment is available in the comments management page, but the comment is not linked to the page, so it does not show up below the page afterwards.

Solution

Revision: 54306

<http://sourceforge.net/p/tikiwiki/code/54306>

Author: jonnybradley

Date: 2015-03-09 17:15:21 +0000 (Mon, 09 Mar 2015)

Log Message:

FIX comments: Pages with a comma in the name was breaking the add-comment target selector (so just remove them)

Thanks Jyhem
