Description

While editing a blog entry, inserting an image by clicking Icon "choose or upload images" will lead user to file gallery (<tiki-root>/tiki-upload_file.php?galleryId=1&view=browse&filegals_manager=blogedit).

btw: This is the same as clicking on "choose or upload files" - icon does. In this case it's ok 😊

Expected: It leads user to image galleries instead (<tiki-root> /tiki-upload_image.php or <tiki-root>/galleries or something like that).

The image gallery has been a deprecated feature for several years. The idea is that the file gallery can handle images as well as other kinds of files so there is no need to duplicate the code with two gallery features. As far as I know, the link to insert an image has opened a file gallery for several Tiki versions now. There's a warning icon on Image Gallery in the Admin-Features page indicating "You can use file galleries instead." This should probably say "You should use file galleries instead."

Hi Lee

Thanks for the info - I didn't know that before. But then...
