Description

Tracker fields of Radio buttons and multiple selection pre-select value 0 when it's one of the options even if not manually set as default

Set as options for that tracker field: 1,2,3,4, and no value is pre-selected (expected behavior)

Set as options for that tracker field: 0,1,2,3,4, and value 0 is pre-selected (wrong behavior; no value should be preselected, since no value is repeated twice)

Workaround (for radio buttons): 0,1,2,3,4, ,
(note that a space is set as option, twice, after value 4).

For multiple selections this workaround is not valid, since value 0 is also pre-selected.

Reproduced here:

http://xavi-9794-5599.show.tikiwiki.org/tiki-view_tracker_item.php?itemId=1&cookietab=2

u: admin
p: 12345

See fields 5 (radio button) and 6 (multiple select)

Update:

Bug still alive, it seems jonny. I svn-up'ed to Thursday March 26, 2015 09:25:10 CET - REV 54744, and new items from your new tracker show a default value of "0" preselected for the radio button, even if no value should be pre-selected according to the configuration.

See:

http://xavi-9794-5599.show.tikiwiki.org/tiki-ajax_services.php?controller=tracker&action=insert_item&trackerId=2&modal=1

And the radio button field definition

(http://xavi-9794-5599.show.tikiwiki.org/tiki-ajax_services.php?trackerId=2&fieldId=9&controller=tracker&action=edit_field) still has as options: "0,1,2,3,4", so no pre-selection is expected, but "0" is pre-selected.

Solution

Hopefully r54738

Bug still alive, jonnyb, unluckily. See the updated report above

Fixed (remaining issue) by anbumania in r54880, and backported to 13.x and 12.x!
