Description

Reproduced in show.t.o from this other wish:

See this:

<http://xavi-9794-5294.show.tikiwiki.org/tiki-editpage.php?page=HomePage>

u: admin

p: 12345

Or the comments at the bottom of the homepage, and try to get some wiki syntax highlighted. It is not, while Preference tiki minify late js files is enabled (Preference name: tiki\_minify\_late\_js\_files)

If you disable Preference tiki minify late js files, then everything works as expected.
