Description
Images displayed with the img wiki plugin are being assigned a CSS class that's simply a number (it's the file id number). This isn't valid CSS. The number should be appended with something like "fileId_".

Solution
Fixed by manivannans.

I have fixed the issue by removing the space between pluginImg and number. Made changes in the page lib/wiki-plugins/wikiplugin_img.php and the line numbers are 888 and 890.
