- ✕ Tracker Email field type does not notify on 'watch closed'

Description

Recently upgraded a site from Tiki 9.x to Tiki 13.1 and found that the Tracker Email field no longer functions.

Steps to Recreate Issue:

When creating an Email field, the option to watch closed is selected.

A new item is created and an e-mail is entered. The item is set to 'closed'.

No e-mail is sent.

The same issue was found in 9.x and I had corrected it previously with a small code change but the same change no longer works in 13.1.
