Description

Find an easy way to help tiki users convert their slideshows made with tiki slideshow feature into a pdf of slides (for backup and life-saver when internet issues at presentation time)

Every now and then, we prepare presentations with the nice Tiki Slideshow feature (jquery.s5) But the day of the presentation, some issues might happen: internet connectivity issues, or others, like in the demo scheduled for the Tiki Roundtable Meeting for April 2015 from teh tekadvocates, etc.

The dompdf lib seemed to help with that, but it was never brought to a production level. See: http://doc.tiki.org/Slideshow#PDF_Export

Some workaround is to make the slideshow by hand through screenshots of all slides, one by one, and then, convert them all into a pdf with external tools, such as gscan2pdf or similar. <http://gscan2pdf.sourceforge.net/>

Solution

partly solved in current slideshow system and export pdf feature.

Missing some features and buggy with real-world cases, but partly working. Closing this bug report as out-dated then
