Description

14.x: tab toggle button from PluginTabs not shown or not working

Reproduced here with android 4.2 default browser (clicking on notabs button does nothing but reload the same page), and with chrome i get no tabs and button to recover the tab diaplay mode (i had clicked in a "notabs" button in the same chrome in normal non-mobile view in a 12.x site): <https://doc.tiki.org/PluginTabs>
