### Description

Hi:

For some reason I can't get login popup to \*.t.o sites from android smartphone.

- t.o/forums: I can't see the "Log in" part on the top horizontal bar of the site, that I see using a desktop computer.
- dev.t.o: I can see indeed the "Log in" part on the top horizontal bar of the site, but clicking on it does nothing (apparently) for me.
- dev.t.o: clicking on the icon to display the contents of the top horizontal bar of the site does nothing for me.

:-/

We need improvements to that \*.t.o site-bootstrapification maybe?

Xavi

Also doesn't work on iOS.

Had a look, i think it's a fault in the forked layout tpl

templates/layouts/fixed\_top\_modules/layout\_view.tpl and/or maybe the custom module doing the navbar etc in the top.

Can't tap the login link when the menu is "uncollapsed" and also the logo isn't there ever.

Gary Cunningham-Lee 17 Sep 15 05:15 GMT-0000

At themes.tiki.org I assigned a second login module, to the pagetop module zone; this module only displays in small screens (visibility controlled using a Bootstrap class). The default log-in module is similarly hidden in small screens.

This is more of a workaround than a fix. We need to brainstorm how to improve the site header section for responsive performance.

Xavier de Pedro 17 Sep 15 06:40 GMT-0000

Thanks Gary! Way better than before!
