Description

Backups should exclude index tables like index_54b7e87271b52 and index_pref_en files such as templates_c/en_classic^d48aca48ad50d46d1f033585608.file.find.tpl.php

Fixed on <http://sourceforge.net/p/tikiwiki/code/56549>

This commit will remove everything from templates_c directory before starting the backup. Since the backup is done while the site is online, for sites with high traffic, some temporary files will be created

and included in the backup.
